

1

When you receive your Node Pistol Pouch you will have the following.

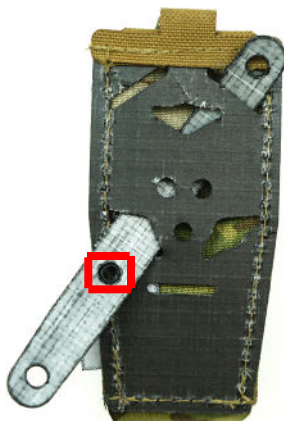

- 1X Node Pistol Pouch
- 1X Strap
- 1X Phillips Head Screw
- 1X Threaded Post

2

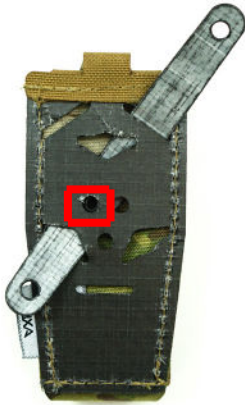

Flip Your Node Pistol Pouch to the rear and insert the strap and route it through (to desired angle) push down on the mounting plate while applying pressure to the strap to allow the strap to protrude out from the mounting plate.

3

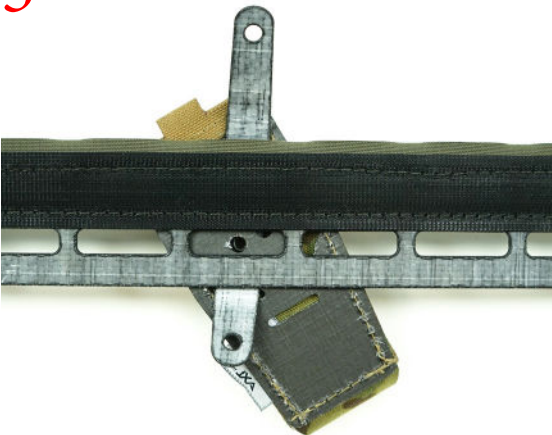

Now you should have the end of the strap piece with two holes out toward the bottom. Insert the threaded post under the strap in the hole marked by the red box.

4

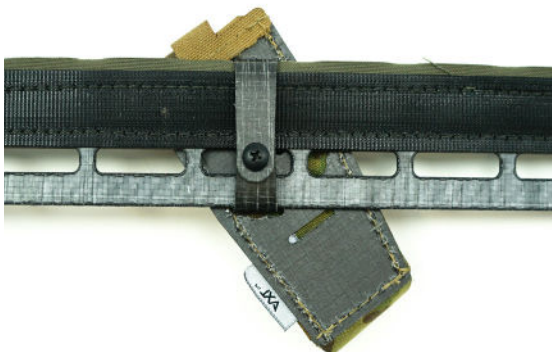

Pull the strap back in with the threaded post inserted into the strap. The threaded post will align with the hole in the mounting plate. (Position will vary depending on mounting angle chosen).

5

Align prepped pouch with desired mounting slot on belt.

6

Fold the strap over the belt, with the bottom end underneath. Insert the provided screw and fasten firmly to the threaded post in the pouch.

Inserting a magazine into the pouch may help with installation.
