

COMMSLED

14103

FEATURES

- Non-destructive, simple installation using factory PTT components
- Offsets the PTT to the side of your carrier
- Improves clearance for carrier-mounted electronics (ATAK, etc.)

DESIGN

The CommSled mounts the PTT offset to the carrier and flexibly allows clearance of ATAK and similar systems, as well as lower profile mounting and improved access to PTT controls. Using shockcord, the CommSled pulls the PTT’s outer edge into the plate carrier’s intercostal space and keeps it spaced so that EUD devices can be used without interference by larger PTTs.

COMPATIBLE WITH:

- Invisio V10 | V20 | V50 | V60 (Can substitute the Invisio Commsled for the MultiMount) (1)
- Invisio X50 (Can substitute the Invisio Commsled for the MultiMount) (1)
- 1 Falcom Dual PTT
- Falcom Single PTT
- Nexus M917715-2 / U94
- TEA Single PTT (2)
- Peltor PTT (3)
- MPU5 (4)
